Question 1. (Single Select)

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How should Prisma Access be implemented to meet the customer requirements?

A: Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the Strata Multitenant Cloud Manager Prisma Access configuration scope to manage access.

B: Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the Prisma Access Configuration scope to manage all access.

C: Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the specific configuration scope for the connection type to manage access.

D: Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the specific configuration scope for the connection type to manage access.

Explanation:

Question 2. (Multi Select)

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

Which two options will allow the engineer to support the requirements? (Choose two.)

A: Configure the CPE with Static Routes pointing to Prisma Access Infrastructure and Mobile

User routes.

B: Enable eBGP for dynamic routing and configure RemoteNetworks.

C: Configure Remote Networks and define the branch IP subnets using Static Routes.

D: Enable Remote Networks Advertise Default Route.

Explanation:

Question 3. (Single Select)

How can an engineer verify that only the intended changes will be applied when modifying Prisma Access policy configuration in Strata Cloud Manager (SCM)?

A: Review the SCM portal for blue circular indicators next to each configuration menu item and ensure only the intended areas of configuration have this indicator.

B: Compare the candidate configuration and the most recent version under "Config Version Snapshots/

C: Select the most recent job under Operations > Push Status to view the pending changes that would apply to Prisma Access.

D: Open the push dialogue in SCM to preview all changes which would be pushed to Prisma Access.

Explanation:

Question 4. (Single Select)

When using the traffic replication feature in Prisma Access, where is the mirrored traffic directed for analysis?

- A: Specified internal security appliance
- B: Dedicated cloud storage location
- C: Panorama
- D: Strata Cloud Manager (SCM)

Explanation:

Question 5. (Single Select)

When a review of devices discovered by IoT Security reveals network routers appearing multiple times with different IP addresses, which configuration will address the issue by showing only unique devices?

- A: Add the duplicate entries to the ignore list in IoT Security.
- B: Merge individual devices into a single device with multiple interfaces.
- C: Create a custom role to merge devices with the same hostname and operating system.
- D: Delete all duplicate devices, keeping only those discovered using their management IP

addresses.

This is a promotional banner for DirectCertify's Certification Exams Study Guides. The background is dark with a large yellow arrow pointing right. On the left, there is a small image of a man in a light blue shirt looking thoughtful. A red "PDF" icon is next to a "FREE TRIAL" button. The main text in large yellow letters reads "CERTIFICATION EXAMS STUDY GUIDES". Above this, it says "100% MONEY BACK GUARANTEED". To the right, there is an image of a hand holding a fan of US dollar bills, with a box stating "50K Plus Satisfied Customers". Below the main title, a list of "Product Features" includes: "100% Success in the Final Exam", "90 Days Free Updates", "Latest Exam Q/A", "24/7 Customer Support", and "Practice Exams". At the bottom, it offers a "Free Demo for Practice Test & PDF". On the right side, there are three circular inset images showing people in professional settings. At the very bottom right, logos for Visa, American Express, Discover, and Google Pay are displayed.
